PROJECTS

FaceTracker - https://face-tracker-app.herokuapp.com/ | https://github.com/puranmgr/face- tracker-app | https://github.com/puranmgr/face-tracker-api

- FaceTracker is a fully responsive web application which uses Clarifai's face detect box model api to track facial features of an image
- Users are able to register and sign in to the web app
- The number of entries submitted by the user is displayed on the screen
- React, Node.js, Express.js, PostgreSQL, Image recognition api (clarifai), Git, GitHub

CalorieTracker - https://puranmgr.github.io/calorie-tracker-app/ | https://github.com/puranmgr/calorie-tracker-app

- A simple meal tracking web application which lets you add items and calories, and the total calories for the day is also displayed on the browser
- Materialise CSS, Vanilla JavaScript, Git, GitHub

Photography/Portfolio website - https://puranmgr.github.io/portfolio/ | https://github.com/puranmgr/portfolio

- Initial website project which introduced the now ever-growing world of web development
- Uses AJAX to dynamically load the content of the photography section of the website
- HTML, CSS, jQuery, Jekyll, Git, GitHub

Work History

DC Operative, Game, June 2017 – Present

- Picking stock items and packaging for Game store dispatch
- Performing stock moves and quality assurance checks
- Coping with repetitive tasks with a passion for customer service
- Showing high standard of literacy and numeracy
